## Video of students talking about their work experience

This is a short film in which students comment on what they see as the most worthwhile and instructive features of work experience. There are some revealing insights as to the opportunities for learning afforded the students, the skills they have been able to practise and the various preconceptions which have been either confirmed or contradicted.

### **Suggested pre-set questions for students watching the video:**

There are five speakers on the film talking about different aspects of their work experience.

For each speaker, try to answer the following questions (Not all the speakers provided answers to all of these questions.)

1. What type of employers/organisations did they work for?
2. What sort of work did this involve?
3. What did they see as the purpose of work experience?
4. What preparation, training or knowledge did some of them think they needed beforehand?
5. What tips did some of them suggest on preparing for work experience?
