

OUTSTANDING TEACHING, LEARNING AND ASSESSMENT TECHNICAL SKILLS NATIONAL PROGRAMME

1a. Careers Questionnaire

Created by: John Ruskin College, BSix Sixth Form College

February 2018

You have to produce either a poster or a PowerPoint presentation, everyone's tree will look different!

Hint: start from the trunk!

At the top of the tree is where your career could end up in say, 10 years time. You should add all the skills, qualifications you should expect to have built up by then
The next job you get should hopefully have some responsibility involved, due to you having been awesome at the last one. What do you need to do here to get to the next level up and what would it be?
The next stage could be your first job, or the next stage up if you already had a job. Write down what skills and experience you will need to gain in this job to start progressing to positions of higher responsibility.
The bigger branches are the next stage – this could be university, a professional qualification, an apprenticeship or your first job.
The trunk of your tree is your current course – the foundation to your future. Write what you need to achieve on this to move to the next stage.
Each branch of the tree could take you through a different direction.
You need to consider at least four different options after your current course, and each branch up will again split into several different opportunities for you.
Make notes on each branch – how long will it take, what do you need to do to prove you can move to the next stage?
If you would like to present this differently you can but the concept is the same – show how you can grow your career from where you are now, and that you have many options open to your future!
