

Domestic turbine

Most building-mounted turbines produce less electricity than pole-mounted ones.

False

Pole-mounted turbines cost less to install than building-mounted turbines.

The main energy source used for domestic microgeneration?

Wood pellets, wood chips or logs

Energy from sunlight

What is anaerobic digestion used for?

Combined Heat and Power

What does CHP stand for?

What is a CHP used for?

Flat plate systems, and evacuated tube systems

Producing bio-gas

In a micro-hydropower turbine system, what causes the turbine to rotate?

Water passing through the turbine

Flushing WC cisterns

What are grey water supplies most commonly used for?

True

Why is an inverter needed for PV panels?

PV panels produce DC current; an inverter converts DC to AC

Yes (as it is made from wood)
