

Intervention Strategies

Learning Resource Centres in M12 and J09

Referral criteria

- Students can refer themselves if they are behind with their assessment schedule or need specific IT support with assignments
- Teaching staff can refer students who are behind schedule, for example following a tutorial or Progress and Progression Board

The Learning Resource Centres are equipped with PC's, printers and quiet workspaces, and are manned by facilitators with good understanding of IT applications and how to structure assignments and assessments. They do not have any specific vocational knowledge but are there to support level 2 and 3 students working on assignments.

Students can attend within planned timetabled sessions with the agreement of the relevant teaching staff member, who will need to book space with the facilitator, or on days when they would not otherwise be at college; in this circumstance the student needs to book a slot in the LRC with the facilitator and make sure that they make appropriate arrangements for their transport
