

## Did you know?

- During trial week one Limbury Block used 740 kWh of electricity which amounts to 402 Kg of CO<sub>2</sub>
- This amount of electricity is sufficient to make 37,000 cups of tea or power a TV for 220 days.
- Heat lost through open doors and windows has a big impact on energy consumption.
- A typical single convector heater uses up to **1340kWh** in a year which is the equivalent of **729kg of CO<sub>2</sub>**.
- Turning off the lights when you leave a room can make a difference.
- Boiling only as much water as you need can save up to **75kg of CO<sub>2</sub> per Year**.
- Laptops use far less electricity than desktop PC's but it is a good idea to set your computer to auto after 15 minutes of inactivity.
- If a battery charger feels warm it is still using energy even after the battery is fully charged.
